DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: on page 7 lines 17, 21, and 22 "lags 74" should be --legs 74--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by McDonald et al (US 5,647,812).

McDonald et al disclose a chain guide (212) comprising: a plurality of sections (266,268) with each section conjoined together via a link (unnumbered middle portion, see Fig 9); each of the plurality of sections (266,268) having a partial upper side (unnumbered bottom portion of Fig 9) which forms, in part, an upper side, all of the partial upper side of the plurality of sections (266,268) together form the upper side of the chain guide (see Fig 9).

Re claim 2, a link (unnumbered middle portion, see Fig 9) disposed to link two adjacent sections of the plurality of sections (266,268) together.

Re claim 3, the link comprises a pin (col. 7 lines 9-20) disposed to pass through annular openings of adjacent sections (see Fig 9).

Re claim 4, the link comprises an elastic member (242a) associated with the pin to maintain shape and compliance with use (see Fig 9).

Re claim 5, the plurality of sections (266,268) consists of a first end section (left side, see Fig 9).

Re claim 6, the plurality of sections (266,268) consists of a second end section (right side, see Fig 9).

Regarding the definition of the term "link" Webster's Dictionary Tenth Edition defines it as "a connecting structure".

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-6 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of copending Application No. 10/693561. Although the conflicting claims are not identical, they are

Art Unit: 3682

not patentably distinct from each other because they are obvious variants in the breath and scope of the claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
